

Dr. Vikki Hufnagel: I got hooked up with Jan when women who were in terrible conditions came to me in LA and I did save their lives. They told me that a voice of truth was on WHO . These women called into WHO to tell their story and that's how I got linked to Jan. During the attack years and my divorce I was working all the time to save my children and not on air . I hope to return to Jan's program. We did a great deal of good over the years for the women in Iowa.

To whom it may concern:

A decade ago, Dr. Vikki Hufnagel was a regular guest on my morning radio talk show. She has a great ability to communicate complicated health issues in a non-technical way. She had a huge following in Iowa, and years later I still get callers asking about her. My highest recommendation is, "She pissed off all the right people". I hope a similar inscription will be found on my own tombstone...just not any time soon.
